### PRECAUTIONS

**Make sure that you plug your scale into the proper power outlet.**

Plug into a power outlet 30 minutes before operations.

<table>
<thead>
<tr>
<th>Warning</th>
<th>Attention</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not disassemble the scale. When any damage or defect occurs, contact your CAS authorized dealer immediately for proper repair.</td>
<td>For consistent and accurate reading, maintain periodical check by your CAS authorized dealer.</td>
</tr>
<tr>
<td>Do not overload beyond the maximum weight limit.</td>
<td>Avoid sudden shock to the scale. Internal mechanism could be damaged.</td>
</tr>
<tr>
<td>Scale must be grounded to minimize electricity static. This will minimize defect or electric shock.</td>
<td>Grab on the bottom of the scale when moving. Do not hold by the platter.</td>
</tr>
<tr>
<td>Do not pull the plug by its cord when unplugging. Damaged cord could cause electric shock or fire.</td>
<td>Keep the scale away from other electromagnetic generating devices. This may interfere with accurate reading.</td>
</tr>
<tr>
<td>To prevent from fire occurring. Do not place or use the scale near flammable or corrosive gas.</td>
<td>Place the scale on firm and temperature consistent environment.</td>
</tr>
<tr>
<td>To reduce electric shock or incorrect reading. Do not spill water on the scale or place it in humid condition.</td>
<td>By adjusting 4 corners of the scale, set the scale even using the built in scale leveling indicator.</td>
</tr>
<tr>
<td>Avoid placing the scale near heater or in direct sunlight.</td>
<td></td>
</tr>
<tr>
<td>Insert plug firmly to wall outlet to prevent electric shock.</td>
<td></td>
</tr>
<tr>
<td>Use proper Adapter. Incorrect adapter could damage the scale.</td>
<td></td>
</tr>

OPERATIONS

When you turn on the power, the scale will count “99999” to “00000”. Then the scale will read “0.00” in the weight display. This is called the ZERO state. If the scale is not ZERO state though there is nothing on the platter, press the ZERO key. The display indicates if the scale is at ZERO or if there is a TARE entered into the scale by way of a ZERO and NET lamps.

1. General Weighing

1. Place a commodity on the platter.
2. Enter a unit price.
3. Remove the commodity from the platter.

NOTE 1: The “▼” represents the lamps on the displays above.
NOTE 2: The unit price is cleared automatically after each transaction.
2. Pricing: 1/2 Key

1. Enter a unit price.

2. Press the 1/2 key.

This function doubles the price per pound.

3. Place the container on the platter.

4. Press TARE key.

5. Enter a unit price.

6. Press the 1/2 key.

3. Pricing: 1/4 Key

1. Enter a unit price.

2. Press the 1/4 key.

This function quadruples the price per pound.

4. Weighing with Tare

A) Unknown (weighed) tare

1. Place the container on the platter.

2. Press TARE key.

3. Place the commodity in the container.

4. Enter a unit price.

5. Remove the commodity with container from the platter. If you want to save tare weight and unit price, press the SAVE key.

B) Known (manually entered) tare

1. Enter tare weight by pressing the numeric key.

2. Press TARE key.
13

12

6. Saving a PLU to Memory

- This function stores each PLU into a internal back up memory.
- PLU means Price Look Up which has a unit price.

For example: $ 3.75 - 125 (address)
Note: maximum address number - 3 digits.

5. Saving a Current Tare Weight and Unit Price

This function saves currently called unit price from automatically clearing.

NOTE: The tare is cleared automatically after each transaction.

Place the container on the platter and enter a unit price.
Place the commodity in the container.
Remove commodity with container from the platter. If you want to save tare weight and unit price, press the SAVE key.

NOTE: The tare is cleared automatically after each transaction.

Enter a unit price.
Press MW key.

Enter a desired address of the PLU.
Press MW key.

Place the container on the platter and enter a unit price.
Place the commodity in the container.
Remove commodity with container from the platter. If you want to save tare weight and unit price, press the SAVE key.

Place a commodity on the platter.
Remove the commodity from the platter. Then the display still shows tare weight and unit price.
7. How to Call a PLU

Make sure that the platter is empty when you call a PLU.

For example: 125(address) - $ 3.75

1. Enter a desired address of the PLU.
2. Press MR key.
3. Place a commodity on the platter.
4. Remove the commodity from the platter.

NOTE: Do not use the decimal point while recalling PLU’s.

8. How to Print

Turn print function on.

1. Press PRINT Key.
2. The Display shows “P on” Auto print function is activated.

Do general weighing.

1. Enter a unit price.
2. Place the commodity on the platter.
3. Remove the commodity from the platter.
