The i500, i1200, and i2600 are professional compact scales with a backlight and extra large LCD screen. The backlight makes it easy to read from a distance. Each scale now comes with a large Stainless Steel tray, parts counting features and 6AA batteries or an AC Adaptor.

Scale professionals know that "multiplied" sensors simply won't cut it when accuracy and durability count. The i500 uses a true 5000 division load cell, the i1200 uses a true 12000 division load cell and the i2600 uses a whopping 26000 division load cell. These commercial grade sensors make this scale incredibly accurate and durable. The i series also has an integrated thermistor to compensate for temperature changes and auto zero tracking to ensure stability.
